We cordially invite you to the 5th annual Unmanned Vehicles Conference Israel Defense which will be held on November 8, 2016 Avenue Conference center at the Airport City

UVID Conference Chairman // Alon Unger

The UVID conference is an initiative of Israel Defense and aims to centralize all strategic systems of unmanned air, naval and ground systems under one roof. To create a dialogue and to build a world of shared knowledge amongst all those engaged in building such forces.

This year's conference will be dedicated to the emergence of the 3rd Generation of Unmanned Vehicles--a significant and comprehensive process worldwide.

Thousands of visitors and guests from over 25 countries have visited and toured the 50 exhibition pavilions, finding past conferences informative and fascinating.

2016 Conference Theme:
"The 3rd Generation of Unmanned Systems & Future Trends"

Conference Topics:

- The global 'arms race' and market trends in the field
- Integration of unmanned systems in modern warfare – concepts and technologies
- The presence of unmanned vehicles on current and future battlefields
- UAVs, UGVs, USVs, UUVs and the synergy between these systems
- Survivability and modern threats to unmanned vehicles
- The challenges of the unmanned layout – operation, development & maintenance
- Lessons learned and intersystem insights
- Breakthrough technologies
- Commercial aspects of unmanned systems

Why Attend?

- The annual event for all involved in the field of Unmanned Vehicles in Israel.
- The international event includes lectures by leaders and policy makers from Israel and around the world.
- A comprehensive professional exhibition of unmanned vehicles and support systems in the air, naval and ground arenas.
- Startup Pavilion.
- 3-D Printing Zone
